Positions for Researchers in Synthetic Organic & Medicinal Chemistry

iThemba Pharmaceuticals (Pty) Ltd., based in Modderfontein, Gauteng, South Africa was founded to discover and develop new and affordable medicines for the neglected infectious diseases of Africa. As part of our ongoing expansion, we require skilled laboratory based synthetic organic chemists to join our Medicinal Chemistry team, which provides novel compounds for projects targeting new therapies for tuberculosis. Candidates will be highly skilled in synthetic organic chemistry, independent thinkers, be able to rationally design novel targets and routes. Candidates with and without supervisory experience in a research environment will be considered. As part of a multi-disciplinary team, the candidate should have an excellent teamwork ethos, with strong communication and presentation skills.

To be considered for these positions, you must be educated to a minimum of MSc. level (or equivalent) in chemistry (or related discipline) and have a keen interest in medicinal and practical synthetic organic chemistry. Additional, relevant postgraduate qualifications and/or industrial experience would be an advantage for these positions.

Period: Full time

Interested applicants should send a letter of application and a CV containing your full academic record to Dr. Chris Edlin at admin@ithembapharma.com by no later than November 30th 2010

Start Date: From January 2011
